# **MOBILIFE**

medical gas delivery system

**Dual Medical Gas Usage**

**Portability and Mobility**

**Dual Electrical supply:**

**Economical**

**Manual Manifold**

**Safety and Services**

**User Friendly**

**Protech Mobilife Mgd50141**

Is a Medical Gas Delivery unit  
its your sure way of delivering any  
compressed medical gas  
such as  
oxygen, medical air and nitrous oxide  
it is mobile, stable and portable

**Dual Medical Gas Usage**

Mobilife is capable of serving oxygen to two adjacent patient bed at the same time without one affecting the other.

**Dual Electrical supply:**

The unit has two electrical socket to provide power for any medical machine to be used on both patient beds.

**Manual Manifold**

Mobilife is equipped with a 2 x 1 manual manifold which steps down pressure from the cylinders at 3000psi to 60psi ideal for patient use. The manifold has two cylinders to ensure uninterrupted supply of medical oxygen. In event of one cylinder being exhausted, supply is simply transfer to the next cylinder by turning a manual control valve.

### Portability and Mobility

Mobilife has brought portability to medical gas delivery to patient. The unit is packed in an attractive mobil cart. It can simple be moved with ease from bed to bed or ward to ward.

### Economy

Mobilife is a more economical method of medical gas delivery to patient. It is far cheaper than a medical gas pipeline system (MGPS) and having all the full features of an MGPS yet it is completely mobile. Have two cylinders, manual manifold two Electrical sockets, two medical gas outlets, two oxygen deliver kit, and all these house an attractive, bedhead-like mobile cart.

### Safety and Services

Mobilife is designed and manufactured in conformity with **HTM-02-01**. All parts are sourced from our UK supplies. The unit is very stable and completely serviceable.

### User Friendly

Mobilife is friendly to use, with single depression of the gas terminal outlet to remove the deliver kits.
